Background

- Following **Portfolio Committee**’s visit to one Chicken Co-operative funded by **sefa**, concerns were raised suggesting corruption and non-payment of Co-Operatives in terms of standing Legal Agreements.

- **sefa** Internal Audit was requested to perform a Forensic Investigation into various allegations and address some of the Portfolio Committee’s concerns.

- **sefa** approved R20 million for four Chicken Co-Operatives 2 in Limpopo and 2 in Mpumalanga at R5 million each. (R4,2m – Instalment Sale Agreement (ISA) & R800K – Working Capital)

- Funding was for construction of additional **Chicken Houses** for each Co-Operative, the supply of Day-Old-Chicks and feed.

- The transaction was based on an **Off-take Agreement** by Kroon’s Abattoir which Super Grand presented to **sefa**. The Co-Operatives were already growing chickens for Super Grand before the **sefa** loan.
Summary of Findings

- **Material deficiencies and irregularities** which related to sefa internal control weaknesses.

- **Evidence of fraud, forgery and possible collusion** between the Supplier and the Technical Partner.

- The Technical Partner has been paid an amount totalling at least the **R4 240 818** by the Off-taker during the period August 2016 until 31 January 2017. However, no payments were made to Co-Operatives during this period.

- Alleged **intimidation** and enticement of Co-Operatives by the Technical Partner to take sefa loans.

- **Misappropriation** of funds earmarked Co-Operatives working capital.
Status of the Project

• All Co-Operatives' loan facilities are currently placed on repayment moratoriums.

• The Technical Partner owes the Co-Operatives payment for several completed cycles. Actual amount still in dispute.

• There is no business activity at all within the Co-Operatives due to disputes with the Technical Partner. Therefore, no revenue is currently being generated.

• Two Chicken Houses in Mpumalanga remain incomplete.

• The Technical Partner is not servicing any of the Co-Operatives by providing Day-Old-Chicks and feed being consequence of existing disputes and non-payment by the Technical Partner.

• The Technical Partner has closed three (3) of its bank accounts.

• The Technical Partner has indicated that the key person is “Absent Without Leave” and have not been able to communicate with him recently.

• Resuscitation of the project to arrive at the initially intended socio economic impact. CEO to provide details.
**Funds Flow Summary**

**sefa approved:**

- **ISA – R4.2mil** per Co-Operative (Totalling **R16.8mil**)
- **Working Capital – R800 000** per Co-Operative (Totalling **R3.2mil**)

**sefa disbursed:**

- **Eagle Eye:**
  - **R8.4mil** for two completed chicken houses (ISA)
  - **R7.56mil** for two incomplete chicken houses (ISA – 90%)

- **Super Grand:**
  - **R1.6mil** for two completed chicken houses (working capital)

**Eagle Eye paid Super Grand:**

- **R5.9mil** for discounted invoices and additional work at milling plant (not disclosed to **sefa**)

</tbody>
</table>
Conclusion

- Significant deficiencies were noted within the Due Diligence, Disbursement and Post Investment Management processes within sefa, which contributed to the demise of the project.

- The lack of "Systems and Procedures" within the Wholesale Lending presents material vulnerabilities and compromise the Control Environment.

- The manner in which the signatures of Legal Agreements by Co-Operatives were effected, denying members an opportunity to peruse and obtain counsel, may affect the validity of the respective contracts.

- Super Grand intentionally siphoned sefa funds amounting to at least R5.9 million out of the project for their own benefit. This act can be singled out to have compromised the project and finalisation of the construction of the Chicken Houses.
Conclusion (Continued)

- There is evidence to suggest that the Technical Partner manipulated the Disbursement Request Forms, in a fraudulent manner and was able to effect disbursements without the knowledge of the Co-Operatives.

- There were areas of negligence during the Due Diligence process, poor consultation with the Co-Operatives which affected the assessment and the nature in which the loan facilities were structured and implemented. This was further evidenced during the implementation of the deal, particularly the Disbursement process as well as the overall management of the project.

- Management transgressed the Credit Policy by approving the loan transaction without a formal Credit Risk Report. This may have exposed sefa and the stakeholders of the project to risks which could otherwise have been mitigated.
Conclusion (Continued)

- There is evidence to suggest that the Co-Operatives were unduly influenced into entering into the Loan Agreements with sefa.
- Key Legal Agreements were omitted and not concluded. These had a significant impact on the rights and obligations of the Co-Operatives as well as sefa's security position.
- Key Conditions were not fulfilled and allowed the inappropriate disbursement of sefa funds.
- Management failed to ensure effective monitoring of the project. Effective monitoring would have ensured early detection of problem areas, at least, between the Co-Operatives and the Technical Partner, where appropriate interventions would have been formulated in order to ensure the success of the project.
Detailed Findings

- The Technical Partner embezzled at least R5.9 million through dubious discounts related to the construction of Chicken Houses by Eagle Plant Hire. The discounts were not disclosed to sefa or the Co-Operatives.

- Allegations by all the Co-Operatives that the Technical Partner forged signatures on the Disbursement Request Forms submitted to sefa on drawdowns. Primary evidence generally supports the allegations.

- R1.6 million paid by sefa to the Technical Partner for the supply of Day-Old-Chicks and feed, yet did not provide chicks, but only some of the feed to the Co-Operatives.

- Tsebere Mphempe Co-Operative was allegedly given an ultimatum by the Technical Partner to accept the terms of the sefa deal or loose doing business with the Technical Partner.
Detailed Findings (continued)

- Amongst several breaches of the Co-Operation Agreement by the Technical Partner, the following were key:
  - Failure to provide Guarantee for the underlying debts of the Co-Operatives, as security to sefa.
  - Steering Committee not set-up for the project.
  - Mentor not appointed to monitor performance of Co-Operatives.
  - Failure to pay Co-Operatives upon delivery of fully-grown chickens to the Off-taker.

- Co-Operatives were rushed into signing Legal Agreements without appropriate perusal and consultation.

- Inadequacies in the Due Diligence performed by sefa:
  - sefa concluded the deal with the Technical Partner on the basis of a Off-take Agreement. However, the Technical Partner had no legal rights to the Off-take Agreement.
  - Lack of consultation with the Co-Operatives. Engagements focused on the Technical Partner.
  - Co-Operatives’ Agreements with Super Grand were never reviewed and aligned to the terms of the sefa loan and implications of the project.
Detailed Findings (continued)

- sefa EXCO approved the R20million loan facilities for Co-Operatives without submission of a formal Credit Risk Report as required by the Credit Policy.

- The sefa Wholesale Team submitted that the Technical Partner had purchased a Chicken Hatchery, which was to supply the Co-Operatives, whereas, this was not the case.

- No resolution was obtained from the Technical Partner, authorising the signatory to do business and contract with sefa and Co-Operatives on their behalf.

- Key Legal Agreements and Conditions not effected/fulfilled by sefa prior to disbursement:
  - A Guarantee by the Technical Partner to cover the Co-Operatives' loans.
  - A Supplier Agreement for the management of the supply of chicken houses for the Co-Operatives.
  - A Maintenance Agreement between the Co-Operatives and the Equipment Supplier.
  - The appointment of a mentor to provide oversight over the Technical Partner.
Detailed Findings (continued)

- Sefa failed to fulfil several Security and Conditions Precedents as per Legal Agreements:
  - Incomplete, invalid and inappropriate suretyships from the Co-Operatives.
  - Guarantee from the Technical Partner not secured to cover Co-Operatives loans.
  - Non-compliance with FICA regulations.
  - Signed Service Level Agreement between the Technical Partner and individual Primary Co-Operatives not obtained.
  - Mismatch between the dates of the Off-take Agreements, namely that the old agreements for some Co-operatives with the Technical Partner expired in 2015 while the agreements for others expired in July 2017.
  - The signed Off-take Agreement is between the Off-taker and an associated company of the Technical Partner but not with the Technical Partner as such.
  - Supplier Agreement between Co-Operatives and the Equipment Supplier of chicken houses was not drafted and signed.
  - Maintenance Agreement between the Co-Operatives and the Equipment Supplier of chicken houses was not drafted and signed.
Detailed Findings (continued)

- Lack of Post Investment Monitoring by sefa:
  - Poor Project Management resulting in failure of the project.
  - Failure to monitor the application of approved funds, resulting in successful fraud/embezzlement by the Technical Partner.
  - Failure to monitor implementation of the project.
  - The Technical Partner's conditions and undertakings were not monitored to ensure compliance. This resulted in multiple breaches of Legal Agreements.
## Recommendations

<table>
<thead>
<tr>
<th>Recommendations</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management should consider laying criminal charges against the Technical Partner and the key person of the Technical Partner for the alleged forgery of Disbursement Request Forms. These charges will have to be supported by the Co-Operatives.</td>
<td>Complete</td>
</tr>
<tr>
<td>Management should consider criminal and civil action against the Technical Partner and the Equipment Supplier for the recovery of funds unjustifiably directed to the Technical Partner through the undisclosed discounts from the Equipment Supplier</td>
<td>Complete</td>
</tr>
<tr>
<td>The Co-Operatives should also consider legal action against the Technical Partner for outstanding payments due to them. Sefa to assist in this regard.</td>
<td>In progress</td>
</tr>
<tr>
<td>Corrective action should be taken with respect to the approval of the loan transaction without a formal Credit Risk Report. Management should review the submission of inaccurate information presented during the approval of the Co-Operatives' loans and determine appropriate action in this regard.</td>
<td>Complete</td>
</tr>
</tbody>
</table>
### Recommendations (Continued)

<table>
<thead>
<tr>

</tr>
<tr>
<td>Continuing probe <strong>into the possible collusion and corruption</strong> by sefa staff in the transaction through criminal investigation with Commercial Crimes Unit of the South African Police Services.</td>
<td>Complete</td>
</tr>
</tbody>
</table>
Possible additional investigations

- Based on the current findings of Super Grand investigation, Internal Audit was requested to review the Wholesale Lending portfolio in order to determine if there any transactions which may be affected in ways similar to the Super Grand/ Co-Operatives transaction. The scope of the review will focus on the Loan Approval process, including the Due Diligence as well the Application of Funds.

- Internal Audit has identified three transactions which may be potentially investigated. A complete summary of the review will be presented to the Board by December 2017. Appropriate action will be taken based on the results of the review.

- As per Internal Audit Annual Plan, grants approved by sefa in the form of Institutional Support will be reviewed in terms of the specified scope. This area has been rated as a high-risk. The review will be concluded by the end of the 2018 financial year.
Developmental Impact

- sefa to develop innovative solutions/products - sefa is challenged by all its stakeholders to come up with innovative solutions to address the triple challenges and to develop products for the unbankable. These innovative product solutions should be radically different from the normal commercial sector and traditional DFI funding. It should also change the existing policies as well as systems and procedures of sefa.

- Shift towards co-operative - With the transfer of sefa from EDD to DSBD the mandate shifted to include focus on rural co-operatives and intense deliberations with various stakeholder took place on the correct funding model. Our value chain model was generally accepted by the sefa stakeholders.

- A pilot is not a final product offering - In order to introduce new solutions it is required that products are piloted. The objective of these pilot projects is to learn (develop lessons’ learnt), refine the product offering, develop systems and procedures, adjust policies (if required) and to ultimately launch the product. The development of systems and procedures usually follows the conclusion of the pilot.
Developmental Impact (Continued)

- sefa’s involvement with the Technical Partner and the group of Co-operatives in Limpopo and Mpumalanga provinces was aimed at advancing economic inclusivity of these participating Co-operatives, thus generating jobs and income for them.

- The project was at a pilot stage, with the ultimate goal of rolling it out to other areas upon successful completion.

- A structured Finance Solution (SFS) product was identified as an appropriate tool to execute this project and the Co-operatives were to participate fully in the poultry value chain.

- The partnership with the Technical Partner was supposed to provide both downstream (i.e. one day old chicks, feed and medicine supply, training and technical support) and upstream linkages in the form of access to market, (i.e the off-take agreement with Kroon’s).

- However, this did not materialise and the intended developmental impact could not be fully realised as only two of the four chicken houses were completed.
Developmental Impact (Continued)

- As a result, **25 direct jobs from the four co-operatives** were created during the active operation of the Co-Operatives.

- **Sefa** is mandated to address market failure in the provision of finance to small businesses, including start-ups, thus it essentially operates in a highly risky market.

- **Agriculture Co-operatives are a high risk business** that exceptionally few institutions are willing to fund.
Lessons Learned

- sefa team acknowledges that there were some gaps in controls in respect of the due diligence and implementation phases of the project.

Outlined below are some of the identified gaps and remedies taken:

a) Addressing vulnerability of Co-operatives

Remedies:

- To address the vulnerability of the co-operatives, sefa undertakes to partner with other government agencies such as SEDA, Department of Agriculture, Local Economic Development and other active players in the Co-operative sector;

- The Steering Committee to appoint a site manager who will communicate and report on all aspects of the project to all stakeholders,

- sefa representatives will explain terms and conditions of the loans and roles and obligations of the members in terms of the loan agreements.
b) Involvement of the Provincial government departments

Remedies:
- The provincial departments will be consulted and form part of the due diligence process.
- A project plan to be developed by the Steering Committee, with the approved project plan incorporating key milestones against which the implementation of the projects will be measured.

c) Financial commitment of the Technical Partner

A technical partner did not commit financially to the project to ensure its successful implementation.

Remedies:
- The future technical partners must share the loan liability of at least 10% of each Co-operative loan and/or inject 10% equity in the project.
Lessons Learned (Continued)

d) Comprehensive review of the legal agreements

All Technical Partner agreements relating to the projects were not reviewed by sefa Legal Department.

sefa did not enter into a direct legal agreement with the constructor of the chicken houses.

Remedies:

- All legal agreements between our partners and their related counter parties who are neither part of the loan agreements nor security arrangements, will be reviewed by sefa's Legal Department to ensure that the interests of sefa and the Co-operatives are safeguarded.

e) Implementation of the projects

Remedies:

A Steering /Technical Committee consisting of sefa, Co-operatives, Provincial representative, Seda, DSBD) has been set up to monitor project's progress, track challenges and address them.
**Action Plan**

sèfa Management has approved the following as an interim measure:

- An initial **moratorium of 6 months on the capital and interest repayments to be reviewed after the final restructure has been concluded**; and

- A **financial services company to provide cash management services and bookkeeping for 12 months and procurement processes will be followed.**

- **Conclusion of Wholesale Lending processes and procedures** which are currently being reviewed by the Internal Audit.

- **Resuscitation of the project**
  - The Steering Committee has engaged the Off-taker which in turn has indicated that they would give the Co-operatives another chance to work with them without the Technical Partner
  - The market access and other services will be provided through a Secondary Co-op and Sèfa will provide the mentorship.
  - The Steering Committee and the sèfa Legal Department are reviewing the new off-take agreement, which will be directly between the Co-operatives and the Off-taker;
  - sèfa will conduct additional investigations to establish the actual value of the liabilities of the Co-operatives, and
  - sèfa will consider restructuring the existing facilities with Co-operatives.
Action Plan in collaboration with Seda/DSBD

- Internal Audit forensic investigation and institution appropriate legal action
- Restructuring of partnerships and Co-operatives loans
- Appoint technical advisor in collaboration with SEDA, DSBD and provinces
- Register secondary co-operatives for the two provinces.

SEFA

- Provide business support and training
- Assist with market access
- Governance training

SEDA

- CIS grant funding for primary co-operatives-working capital e.g. repairs and maintenance
- CIS grant funding for secondary co-operatives e.g. marketing

DSBD
Chicken Growing Process Summary

Day 1
Place Day Old Chicks in chicken house. Super Grand to supply.

Day 1 - 35
Growing Days. Super Grand to supply medicine and feed.

Day 35
Take Full grown chickens to Kroon’s Abattoir

Day 36 - 37
Stock (Broilers) clearing, removing equipment & Litter

Day 38 - 39
Cleaning & disinfecting

Day 40 - 49
Resting The chicken house

Day 50
Start of next cycle
