## **MEMORANDUM ON THE OBJECTS OF THE CRITICAL INFRASTRUCTURE PROTECTION BILL, 2017**

### **1. BACKGROUND AND PURPOSE**

- 1.1 The Critical Infrastructure Protection Bill, 2017 (“the Bill”), seeks to replace the National Key Points Act, 1980 (Act No. 102 of 1980) (“the Act”), and corresponding laws of the former TBVC States. The Act was initially administered by the Minister of Defence. However, the administration of the Act was transferred to the Minister of Police.
- 1.2 The Act was passed in 1980 and has become outdated and is not aligned with the constitutional imperatives. The Act has not been amended since it was put into operation and has been criticised as “old order” legislation.
- 1.3 The Bill responds to international developments relating to the protection of Critical Infrastructure. The modern definition of Critical Infrastructure is wider than “safeguarding” which was an objective of the Act. It is increasingly accepted that the protection of critical infrastructure has become a much broader concept with a distinctly new focus in that the concept increasingly refers to preventative security measures as well.
- 1.4 Countries have different approaches to protection of critical infrastructure. The Chinese approach to critical infrastructure is viewed as an attempt to reconcile the internal security endeavours of the state with the necessity of economic modernisation with regard to information technology. India drew up a definitive action plan that statutorily mandated the establishment of dedicated organisations and guidelines for the area of IT security. In the United States of America, the Department of Homeland Security is coordinating all the US government’s critical infrastructure protection initiatives at governmental level. Canada has incorporated information and communication technology (ICT) protection in its “Total Defence” overall concept and follows the All Hazards approach.
- 1.5 A common thread running through the approaches of these nations is the adoption of an all-hazards approach aimed at improving their ability to anticipate vulnerabilities to current and future threats.
- 1.6 In recent times, the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000), was used to request information relating to declared national key points. The High Court in the matter of the Right2Know Campaign alluded to certain aspects of the Act that require review relating to provisions that do not prohibit the disclosure of national key points, the public interest that national key points should be disclosed, and the constitutional rights to freedom of expression, movement and access to information.
- 1.7 It is also necessary that the Bill is harmonised with other legislation such as the National Strategic Intelligence Act, 1994 (Act No. 39 of 1994), the Regulation of Gatherings Act, 1993 (Act No. 205 of 1993), the Disaster Management Act, 2002 (Act No. 57 of 2002), the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000), the Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000), and the Firearms Control Act, 2000 (Act No. 60 of 2000).
- 1.8 In order to improve the statutory framework regarding the protection of critical infrastructure, the Act is to be repealed by a constitutionally friendly Bill to provide for all security issues related to critical infrastructure.

### **4. IMPLICATIONS FOR PROVINCES**

None.

### **5. CONSTITUTIONAL IMPLICATIONS**

The Civilian Secretariat for the Police Service will be responsible for any remuneration of members of the Council who are not members of the public service. The relevant government departments and institutions will be responsible for the remuneration and costs of participation at meetings of their employees who serve on the Council. The South African Police Service will be responsible for the expenses relating to the activities of the National Commissioner.

### **8. PARLIAMENTARY PROCEDURE**

8.1 The State Law Advisers and the Civilian Secretariat for Police Service are of the opinion that the Bill should be dealt with in accordance with procedure set out in section 75 of the Constitution, since it contains no provisions to which the procedure set out in sections 74 or 76 of the Constitution applies.

8.2 The Constitution distinguishes between four categories of bills as follows: Bills amending the Constitution (section 74); Ordinary Bills not affecting provinces (section 75); Ordinary Bills affecting provinces (section 76); and Money Bills (section 77). A Bill must be correctly classified or tagged, otherwise it would be constitutionally invalid.

8.3 The Bill has been considered against the provisions of the Constitution relating to the tagging of Bills, and against the functional areas listed in Schedule 4<sup>1</sup> to the Constitution.

8.4 The crux of tagging has been explained by the courts especially the Constitutional Court in the case of *Tongoane and Others v Minister of Agriculture and Land Affairs and Others 2010 (8) BCLR 741 (CC)*. The court in its judgment stated as follows:

---

<sup>1</sup> Functional areas of concurrent national and provincial legislative competence

“[58] What matters for the purpose of tagging is not the substance or the true purpose and effect of the Bill, rather, what matters is whether the provisions of the Bill “in substantial measure fall within a functional area listed in schedule 4”. This statement refers to the test to be adopted when tagging Bills. This test for classification or tagging is different from that used by this court to characterise a Bill in order to determine legislative competence. This “involves the determination of the subject matter or the substance of the legislation, its essence, or true purpose and effect, that is, what the [legislation] is about”. (footnote omitted)

[59] . . .

[60] The test for tagging must be informed by its purpose. Tagging is not concerned with determining the sphere of government that has the competence to legislate on a matter. Nor is the process concerned with preventing interference in the legislative competence of another sphere of government. The process is concerned with the question of how the Bill should be considered by the provinces and in the NCOP, and how a Bill must be considered by the provincial legislatures depends on whether it affects the provinces. The more it affects the interests, concerns and capacities of the provinces, the more say the provinces should have on its content.”

- 8.5 In light of what the Constitutional Court stated in the abovementioned case, the test essentially entails that “any Bill whose provisions in substantial measure” affect the provinces must be classified to follow the section 76 procedure.
- 8.6 The Bill seeks to repeal the Act and corresponding laws of the former TBVC States and to provide afresh for the protection of critical infrastructure in the Republic. In our view the provisions of the Bill do not fall within any of the functional areas listed in Schedule 4 to the Constitution. Consequently, we are of the opinion that this Bill is an ordinary Bill not affecting provinces and that it must be dealt with in accordance with the procedure set out in section 75 of the Constitution.

## **9. REFERRAL TO NATIONAL HOUSE OF TRADITIONAL LEADERS**

The opinion is held that it is not necessary to refer this Bill to the National House of Traditional Leaders in terms of section 18(1)(a) of the Traditional Leadership and Governance Framework Act, 2003 (Act No. 41 of 2003), since it does not contain provisions pertaining to customary law or customs of traditional communities.
